Driving Energy

We are Europe's largest independent electricity transmission system operator.

We are engaged in **driving and enabling the ecological transition** in order to create a new development model based on renewable sources and respect for the environment.

Sustainability, innovation and distinctive competencies are behind everything we do, with the aim of providing the generations to come with a clean, accessible and emission-free energy future.

We have the major responsibility for providing the country with energy, ensuring **security, quality and cost-effectiveness over time**.

We manage Italy's high-voltage electricity transmission grid, one of the most modern and technologically advanced in Europe, which we are working to **develop and integrate with the European grid**, guaranteeing secure and **equal access to all grid users**.

We are developing **Non-regulated Activities** and new business opportunities, making our expertise and experience available in Italy and overseas.
